ez VISIT

End to End VISITOR TRACKING

VISITOR POLICY ADMINISTRATION

- Central visitor management policy administration for multiple entry points of same premises or for multiple branches across geographies
- Interface for setting up mandatory visitor information fields, visitor card issuance guidelines, approval guidelines, approval hierarchies and approver groups, specifying areas for visitors or contract workers

VISITOR REQUEST WEB/MOBILE INTERFACE

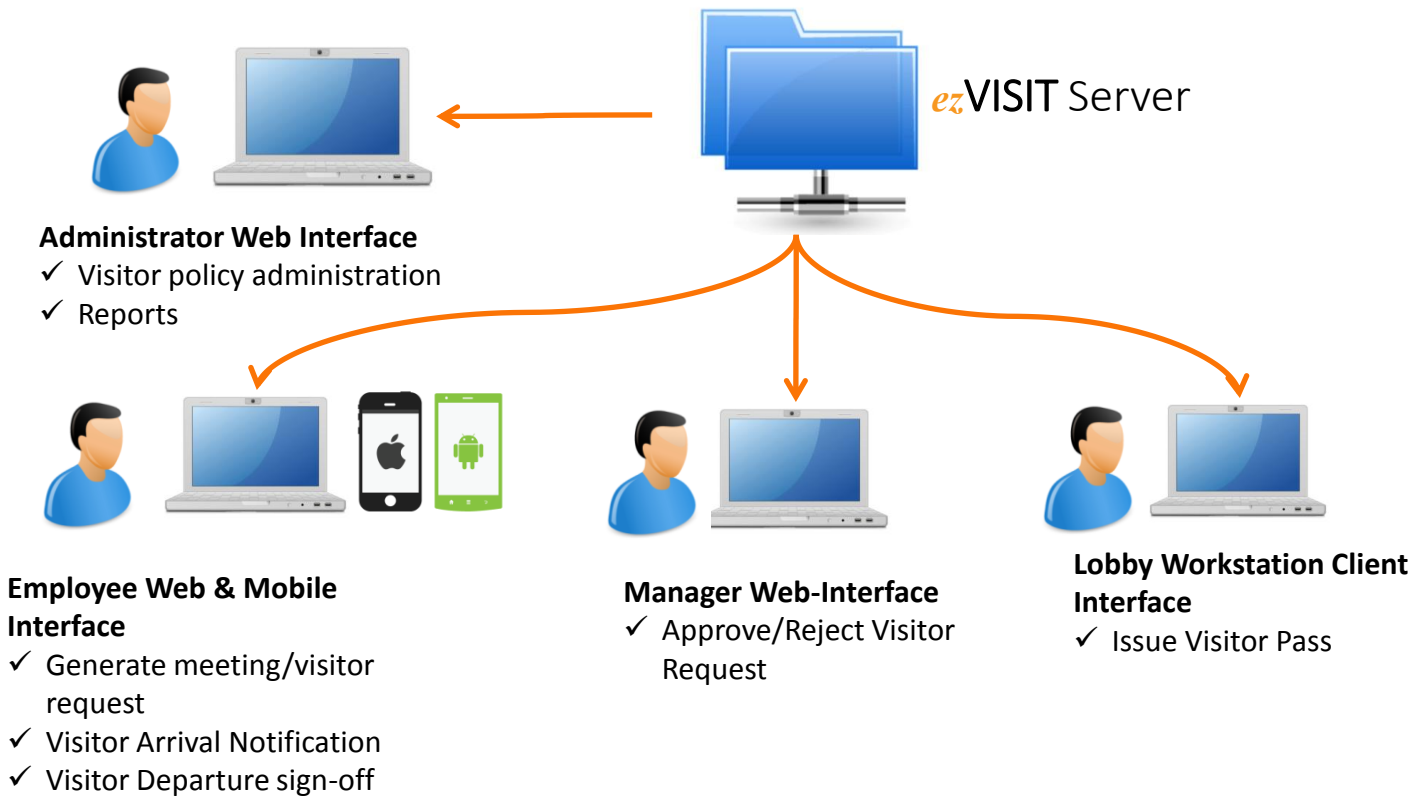

- Web/mobile based user interface for employees to send visitor request
- Generate a meeting form and enter meeting particulars – meeting start date/time, end date/time, meeting room, add one or more attendee(s) to the meeting
- Quick search for pre registered visitors
- OUTLOOK calendar integration
- Single-click approval or rejection process by designated authorities
- SMS and Email notifications
- Visitor departure sign off

VISITOR LOBBY INTERFACE

- Reception interface for lists of expected visitors, requests awaiting approval, rejected requests and visitor's particular(s).
- Integration with web camera, pass printer, signature pad, document scanner, visiting card scanner, fingerprint scanner and barcode scanner

- Unique face detect feature for automatic face cropping for quick and clear visitor snapshot
- Banned visitor notification
- Issue RFID Access card & assign access groups providing access to predefined locations for specific interval of time
- Single click Pass printing as per pre designed templates
- Issue asset pass for visitor assets such as laptops, demo equipments and tools
- Issue vehicle pass
- SMS, Email and dashboard alerts upon visitor arrival
- On screen alert on visitor over stay

RECORD KEEPING

- Maintenance of records of visitors, contractors and vendors through their IDs, photographs, access rights and access history
- Reports on visitors, contract workers, requests, approvals, rejections, access and movement patterns for granular forensics and security diagnostics

SELF SERVICE KIOSK MODE

- Visitor self help kiosk mode for quick pass issuance

ACCESS CONTROL INTEGRATION

- Service Oriented Architecture (SOA) for easy integration with third party access control systems.

PASS DESIGN

- Design visitor pass by specifying size, adding company logo, signatures, identifiers or names of requestor, visitor type and more

CONTRACTOR ACCESS MANAGEMENT

- Segregate visitors among multiple categories such as contractor, visitor, vendor etc
- Issue multi day pass
- Record daily IN and OUT timings via Barcode/RFID
- Optional de-duplication engine to uniquely identify visitors via biometric finger print verification

IDCUBE is uniquely positioned as a comprehensive physical access control and positive identification assurance provider via its Access 360 software suite for organizations of all sizes.

We are trusted by large businesses and SMEs across industries. We work with some of the most acclaimed global system integrators and solution providers. IDCUBE's distributor and channel partner network now has over 100 active businesses and this number is growing because of the opportunities our partners see in working with us.
