

Hospitality

Seamless solutions for
enhanced guest experience
and efficient operations

In the dynamic world of hospitality, diverse access needs and entities pose a challenge to the safety of valued customers and data security.

Our solution offering **AI-powered** physical access control system tailored to the unique demands of the hospitality. With our seamless integration and innovative technology, we ensure a safe and secure environment, fostering trust and convenience for guest & staff.

Unlock the future of hospitality with IDCUBE.

BENEFITS

Enhance Guest Experience

Seamless access to common areas with our integrated solution, simplifying entry without delays or complications

Pre-emptive Risk Management

Anticipate and proactively mitigate risks in your properties using AI-powered actionable insights

Assured Safe Stay

Automate emergency management procedures with accurate guest and staff counts to ensure safety from natural, accidental, and human actions

Optimised Security

Integrated physical security solution with data privacy compliance for advanced surveillance of your security posture

Green Initiative

Promote sustainability, reduce energy consumption, and meet environmental standards for a future-forward Hospitality

Brand Enhancement

Enhance your brand perception with a secure, welcoming environment, automated processes, and eco-conscious initiatives

FEATURES

Unified FoH & BoH Systems

Seamless Issuance

Our unified system enables single-click issuance for staff and guests, ensuring swift and accurate distribution of credentials.

Automated Access

Unified system for staff and guests' access to designated FoH and BoH areas, ensuring effortless entry to all amenities.

Centralized Monitoring

Seamlessly monitor access events, security breaches, and system health in real-time across FoH and BoH areas providing comprehensive oversight and control from a single command centre.

Safety & security of esteemed guest

Lockdown

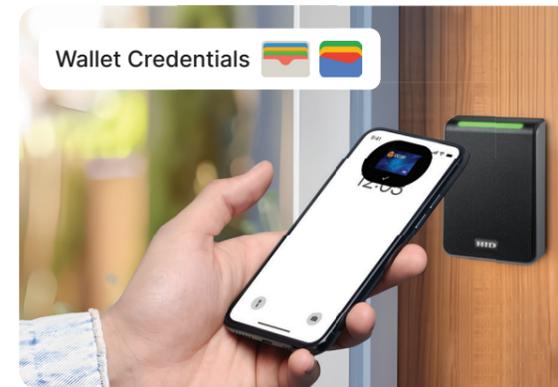

Activate instant lockdown to secure all access points, swiftly responding to emergencies like intrusions or situations caused by human actions, ensuring rapid containment and enhanced safety protocols across the premises.

Evacuation

Automate evacuation procedures for fire and natural disasters with real-time headcounts to streamline emergency response and rescue efforts.

Intercom Integration

Significantly enhance the safety of guests and staff with integrated emergency call stations, enabling lockdowns, evacuations, and responses to health emergencies.

Staff/Contractor Access & Attendance

Efficiently manage shifts, rosters, leaves and ensure accurate time tracking; seamlessly integrate with HRMS for staff payroll automation and controlled access to designated areas.

Green ID

The mobile app offers staff e-badges, BLE and wallet credentials, dynamic QR codes, and e-business cards; eliminating physical cards, reducing the carbon footprint, and promoting sustainability in facilities.

VMS Integration

Centralized monitoring with a single window for events, alarms, and videos, ensuring quick investigations and responses.

ANPR Integration

Automate vehicle access with vehicle profiling and auto-update allowlist in ANPR, ensuring efficient and secure entry for approved vehicles.

Key management integration

Integrate user and credential data with key management, enabling event and alarm notifications for authorized cabinet access and centralized monitoring through our Access Control system.

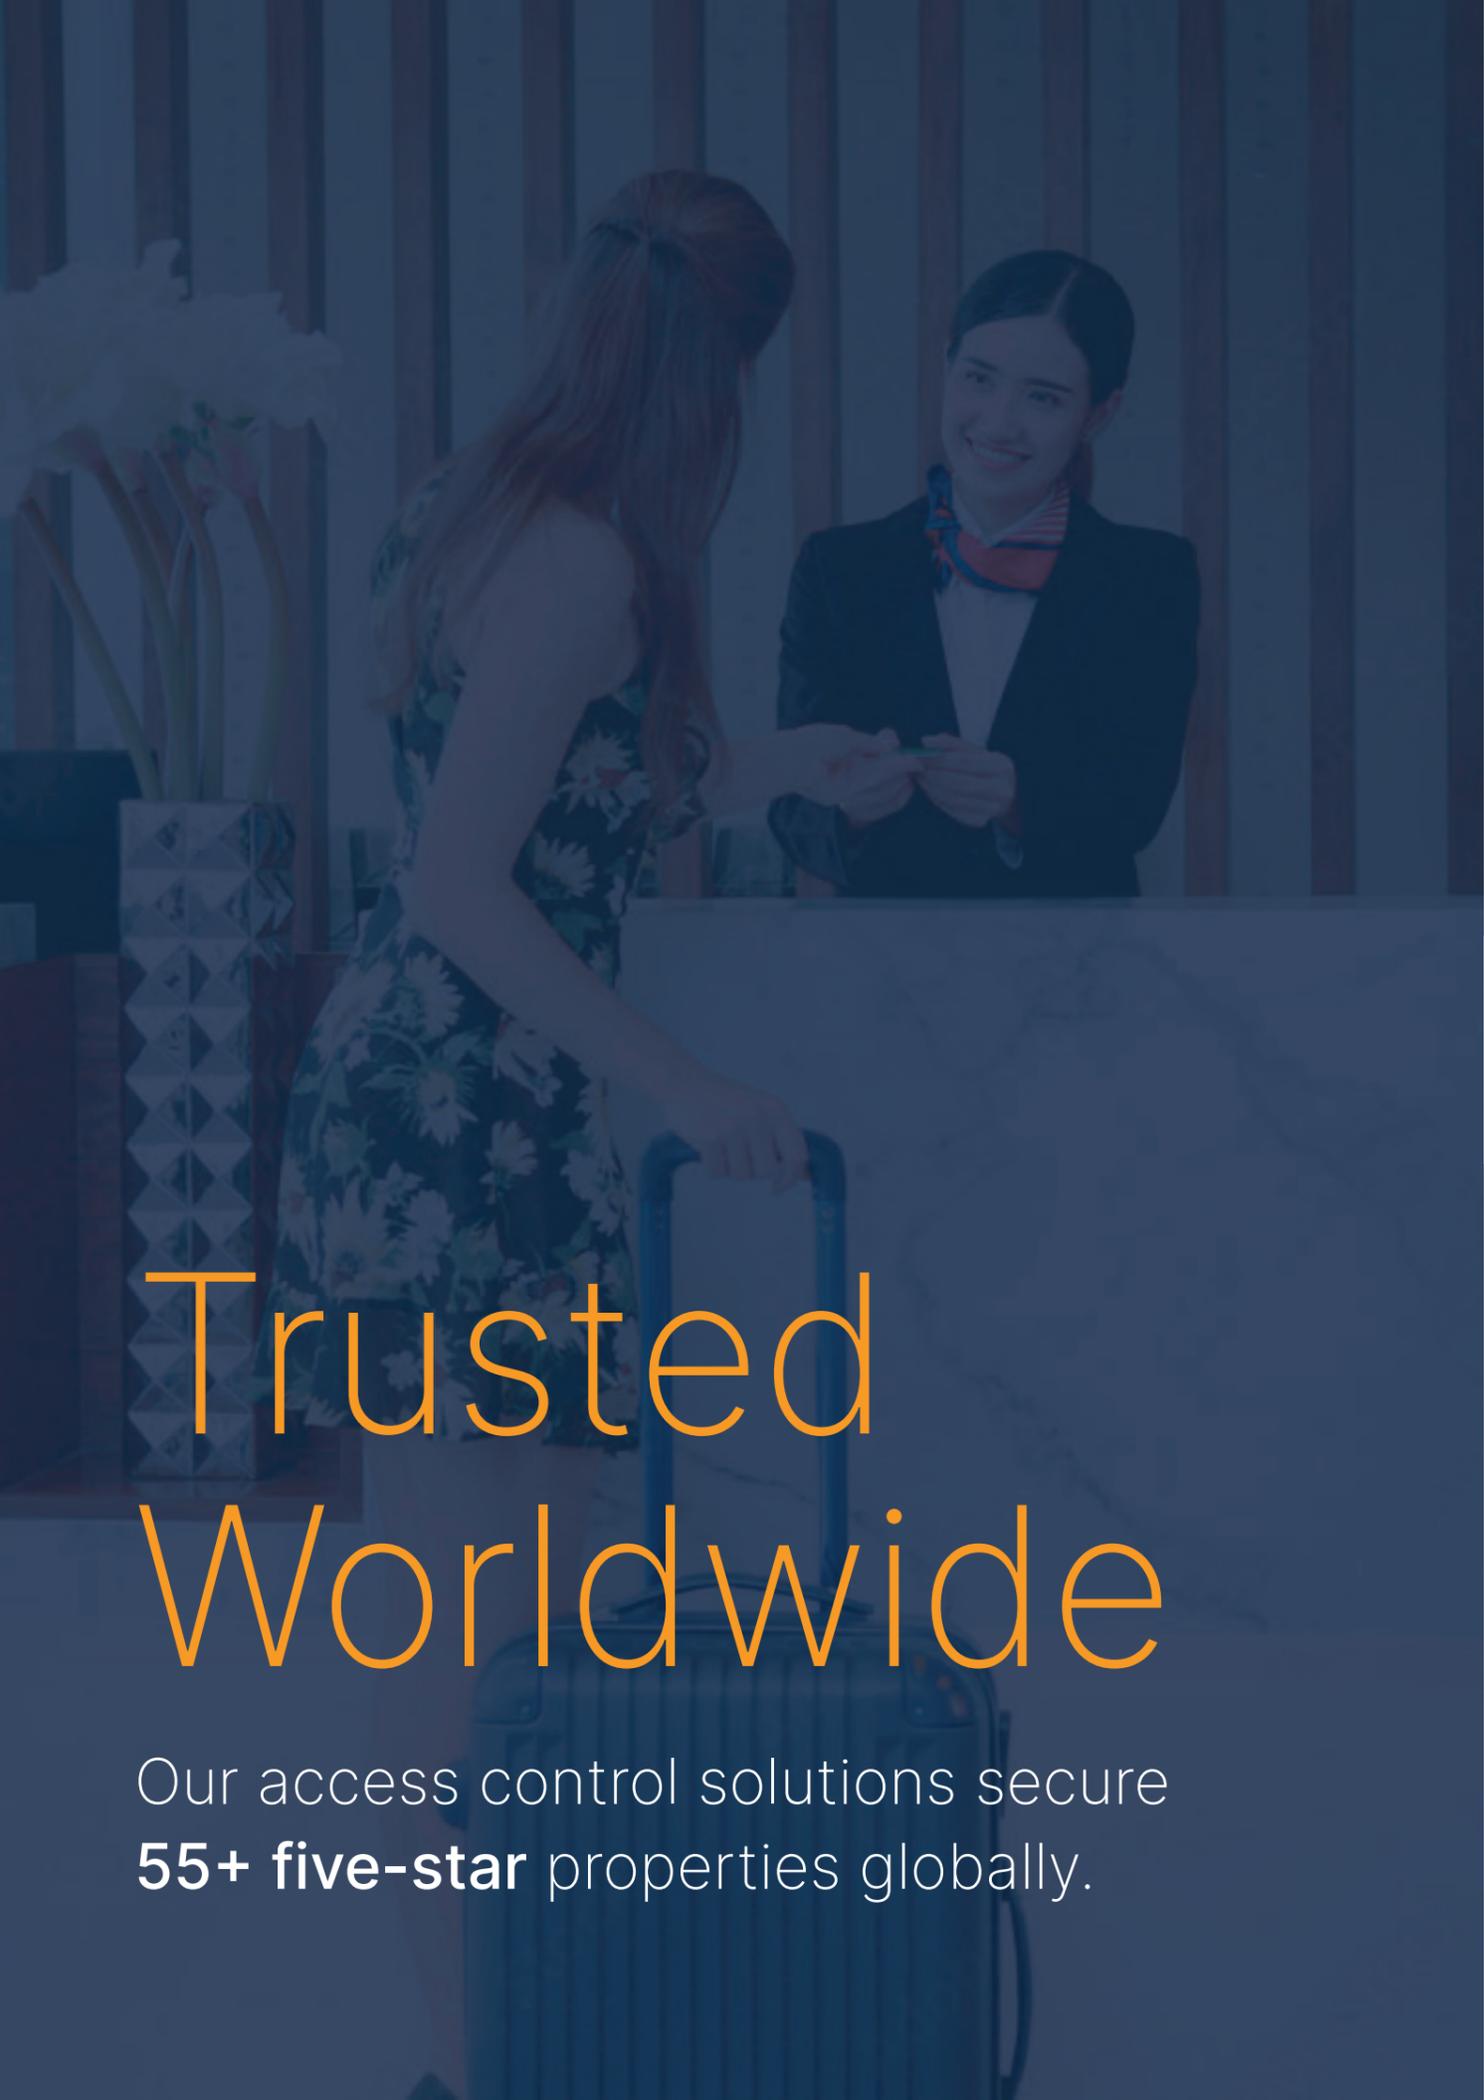

Alnsights

Employ AI for risk management, anomaly detection & insider threat prevention. Optimize space utilization and reduce energy costs with occupancy heat maps.

Fort Knox Security

Ensure data security compliance with ISO 27001 & 27018, SOC2, GDPR, PCI-DSS, HIPAA, and NIST-SP 800-53.

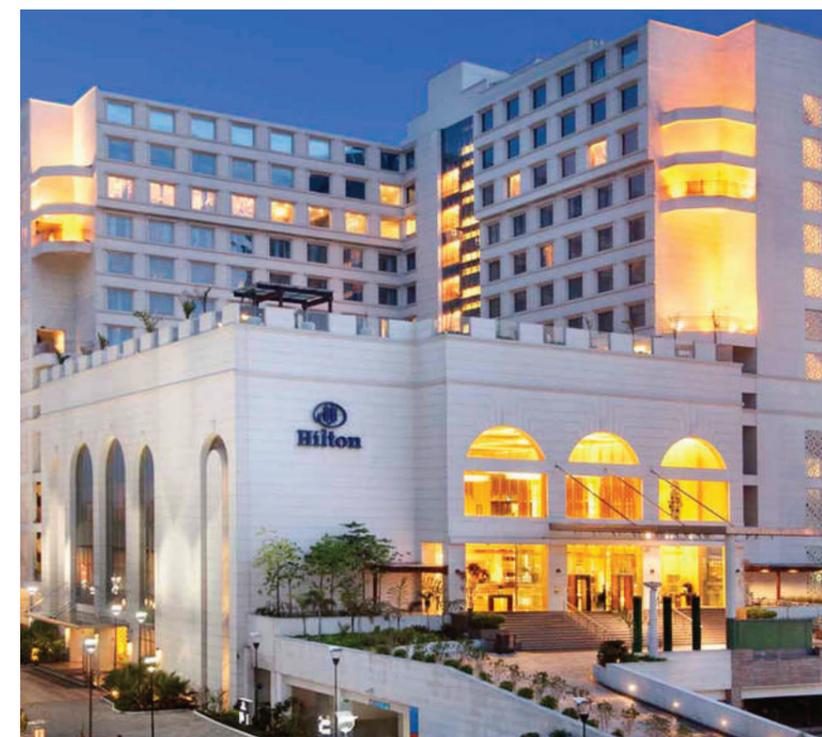

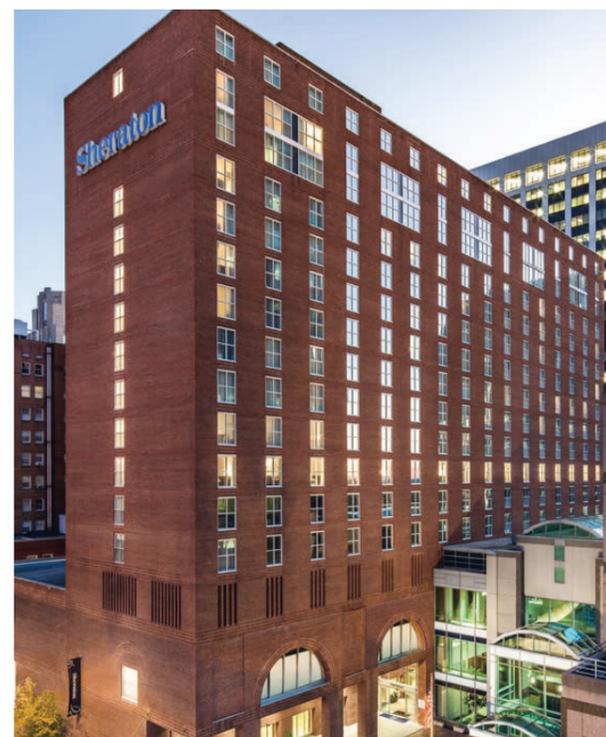

Trusted Worldwide

Our access control solutions secure 55+ five-star properties globally.

“Securing your premium property with our advanced **Access Control** solutions.”

We built the World's first AI-powered operating system for physical Access Control — **Access360**.

The OS provides comprehensive support for a wide range of physical identities, encompassing legacy credentials like smartcards and biometrics, as well as virtual ones such as mobile credentials and QR codes. This enables secure and agile authentication of diverse entities across various facilities.
