

Co-working Spaces

Empower your Co-working
Community with Seamless Access
Control Solutions

USA

Rapidly growing co-working businesses face challenges in managing diverse members & spaces, badge distribution, meeting rooms, and overall data privacy.

Access360, our Cloud-based Physical Access control System, provides a seamless onboarding and access experience for your members and visitors that eliminates physical touchpoints, ensures data security and privacy, and promotes sustainability.

Establish a future-ready, Smart, Secure, & Sustainable Co-working space with Access360.

BENEFITS

Enhance Member Experience

Seamless access to common areas with our integrated solution, simplifying entry without delays or complications

Pre-emptive Risk Management

Anticipate and proactively mitigate risks in your properties using AI-powered actionable insights

Seamless Issuance Process

With automation and integration, reduce your employees' onboarding time from months to minutes

Brand Enhancement

Enhance your brand perception with a secure, welcoming environment, automated processes, and eco-conscious initiatives

Green Initiative

Promote sustainability, reduce energy consumption, and meet environmental standards for a future-forward Co-working Space

Cost Savings

Reduce your access control infrastructure & operations cost by 80% with mobile credentials and the cloud platform

FEATURES

Seamless Member Onboarding

Integration with the member management platform enables automated mapping of member profiles, issuance of access credentials, and assignment of access rights, resulting in a seamless, zero-touch onboarding experience.

E-badge for Members

Customizable, auto-updating digital identities with live animations eliminate the need for physical IDs and manual member ID distribution while maintaining robust security.

Sustainable Practices

Transform your workspace into an eco-friendly co-working hub by minimizing carbon footprints through virtual credentials, paperless visitor management, cloud hosting, and AI-driven analytics.

Digital Access Credential

Switch to virtual credentials with options for QRify - Dynamic QR codes, BLE credentials, and wallet credentials, providing the most cost-effective and secure solution.

Unified App for Access, Attendance & Visitor Management

GreenID is an intuitive app for logging and viewing attendance, inviting visitors, scheduling meetings, booking meeting rooms, and providing access through dynamic QR codes, wallets, and BLE credentials.

Meeting Room Access Automation

Automate access permissions for meeting rooms based on visitor scheduled times to ensure efficient and appropriate meeting room utilisation.

Controlled Access to Varied Spaces

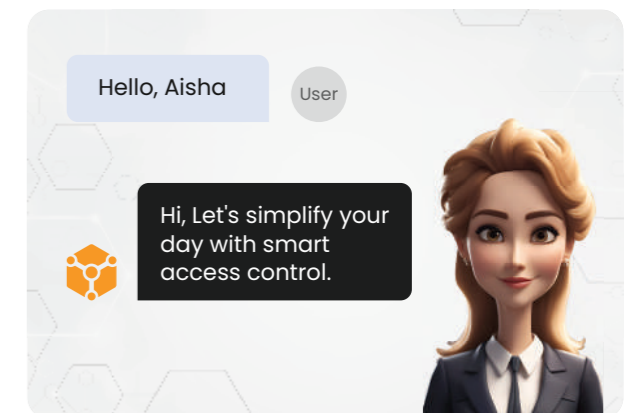

Efficiently manage and segregate access rights with customizable access rules for shared and private spaces and amenities, allowing only authorised personnel to access designated spaces.

Aisha-Gen AI-powered Chatbot

Aisha, powered by Gen-AI, simplifies complex interfaces by enabling natural language queries for quick, precise answers, improving efficiency in system insights, troubleshooting, and data retrieval.

Proactive Threat Detection and Analysis

Alnsights ensures business continuity by detecting vulnerabilities, analyzing alarm threats, and uncovering risky behaviors, transforming raw data into actionable insights for enhanced organizational security.

Centralized Monitoring

Seamlessly monitor access events, security breaches, and system health in real-time across all areas providing comprehensive oversight and control from a single command centre.

Fort Knox Security

Ensure data security compliance with ISO 27001 & 27018, SOC2, GDPR, PCI-DSS, HIPAA, and NIST-SP 800-53.

We built the World's first AI-powered operating system for physical Access Control — **Access360**.

The OS provides comprehensive support for a wide range of physical identities, encompassing legacy credentials like smartcards and biometrics, as well as virtual ones such as mobile credentials and QR codes. This enables secure and agile authentication of diverse entities across various facilities.
