

Education 

Step into a Safe and Secure
Learning Environment

UAE

The educational landscape faces paramount challenges, such as misplaced ID/Access Cards, hostile situations and diverse safety & security needs.

With IDCUBE's AI-Powered 'CLOUD/ON Prem' Physical Access Control System (PACS) institutions can seamlessly manage the safety & security protocols, automate ID issuance & streamline emergency management. Elevate your institution's brand value with our mobile credentials and sustainable approach, transforming to a carbon-neutral campus.

BENEFITS

Simplification

Streamline your campus with an open platform, eliminating complex functionalities and reducing the workforce, making it easier to manage and operate

Elevate Security

Shift to improved and preventive campus security with advanced AI analytics and actionable security Insights

Brand Enhancement

Enhance your institute's brand value by making it a modern, tech-forward campus with a secure, welcoming environment, automated processes, and eco-conscious initiatives

Boost Productivity

Reduce administrative overhead time from 2 weeks to just 2 minutes with our efficient automation and integration

Green Campus

Reduce energy consumption and help your institute meet environmental standards for a future-forward Green Campus

Cost Savings

Reduce your access control infrastructure & operations cost by 80% with mobile credentials and the cloud platform

FEATURES

Campus Access Management

Empower administrators with precise role customization to efficiently manage multiple university campuses, schools, colleges, and institutes.

Optimize Classroom Access

Implement automated access to classrooms based on enrolled courses, ensuring efficient and secure entry for students.

Campus Entry Automation

Students, staff, and vehicle entrance automation via mobile credentials, biometric systems or RFID.

Emergency Lockdown & Evacuation

Integrate PACS with emergency protocols to swiftly manage and respond to critical situations like intrusion and fire, ensuring the safety of property, students, and staff.

Fest/Event Access

Facilitate temporary streamlined access for attendees to campus events or festivals, managing entry efficiently and eliminating unwanted footfall.

Recreational Facility Security

Control access to campus gyms, sports complexes, and other recreational facilities, optimizing use while ensuring safety.

Professor/Faculty Cabin Control

Self-controlled access to faculty cabins with ease, right at your fingertips.

Hostels/Dormitories Access

Specialized rule-based access to dormitories and other residential facilities using wireless or no-tour latch locks, ensuring safety and privacy.

Aisha-Gen AI-powered Chatbot

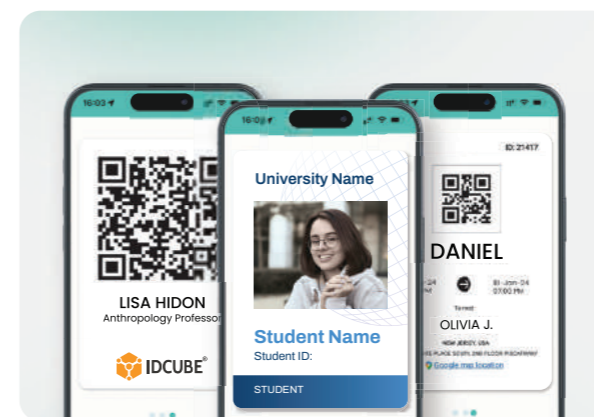

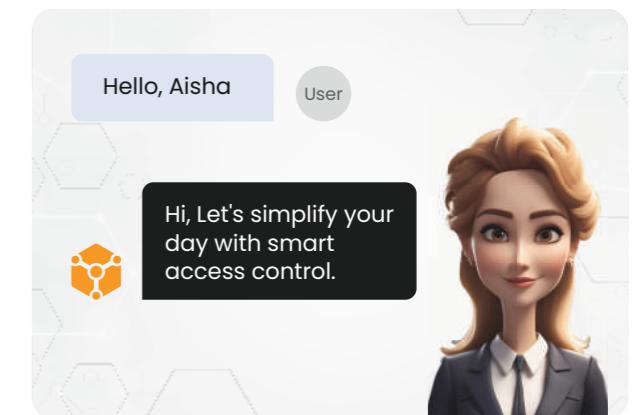

Aisha enhances the campus experience with natural language queries, delivering instant, accurate responses and boosting operational efficiency.

SIMS Integration

Integrate seamlessly with the Student Information Management System (SIMS) to automate access permissions based on changes in student status, such as enrolment and transfers.

Centralized Campus Monitoring

Monitor access events, security breaches, and system health in real-time across schools and campuses from a single command center.

e-badge and Virtual Credentials

Replace traditional plastic ID cards with dynamic virtual credentials that enhance security through live animations, streamline the issuance and revocation process, and promote cost savings.

Visitor & Campus Tour Management

Enable Visitor pre-registration, implement approval workflows and manage walk-ins with comprehensive in-built Visitor Management.

We built the World's first AI-powered operating system for physical Access Control — **Access360**.

The OS provides comprehensive support for a wide range of physical identities, encompassing legacy credentials like smartcards and biometrics, as well as virtual ones such as mobile credentials and QR codes. This enables secure and agile authentication of diverse entities across various facilities.
